SKILLS

- **Programming Languages:** Java, JavaScript, C++, SQL, HTML5, CSS3
- **Frameworks & Technologies:** React.js, Angular, Redux, Node.js, Spring Boot, FastAPI
- **Databases:** MySQL, MongoDB, Firebase, Oracle SQL
- **Others:** RESTful APIs, Microservices, Information Security, JWT, Data Structures and Algorithms (DSA), High-Level Design (HLD)

PROFESSIONAL EXPERIENCE

SBI General Insurance (SBIG)

June 2025 - Present

Software Development Engineer

Thane, India

- Led 7 major full-stack in-house projects, building 4 from scratch, achieving 99% uptime and earning commendations from the CIO.
- Implemented RESTful APIs and followed Agile Scrum methodology to deliver robust microservices-based applications, improving overall application scalability by 30%.
- Achieved and maintained 100% Information Security compliance across all deliverables with zero audit findings, integrating comprehensive unit testing and automation.
- Managed application support for 5 critical platforms (NCB, IIB, MCRS, EMS, Vehicle Inspection), resolving over 200 high-priority incidents with a 100% resolution rate.

Hyperverge

Jan 2025 - June 2025

Integration Engineer Intern

Mumbai, India

- Spearheaded KYC REST API integrations for key enterprise clients (SBI Life, HDFC Pension), optimizing B2B data flows and improving data processing speed by 25%.
- Collaborated with cross-functional teams to debug complex technical blockers, reducing client onboarding time by 30% and improving overall operational efficiency.

KEY ENTERPRISE & TECHNICAL PROJECTS

Commercial Claim Management System (CCMS) - React.js, Redux, Java Spring Boot

SBIG

- Developed scalable frontend and backend components for an enterprise Commercial Claim Management System, coordinating with teams to reduce overall development time by 40%.
- Modernized the UI utilizing advanced React features (Redux, lazy loading, component-based architecture), boosting system efficiency by 60% compared to legacy platforms.
- Engineered backend services using real-time STOMP WebSockets to implement a UI locking mechanism for critical reserve updates, preventing concurrent data overwrites and guaranteeing 100% data integrity.

Partner Service Hub (PSH) - React.js, Spring Boot, DevOps

SBIG

- Developed a modern cloud-deployed portal to replace legacy systems for agent policy downloads, renewals, and endorsements, successfully driving a 300%+ increase in user traffic.
- Drove the end-to-end project lifecycle, from initial UI/backend development to CIO presentation, successfully deploying to production 2 weeks ahead of schedule.

Vendor Attendance & CR Tracker (VACT) - React.js, FastAPI, Microservices, Deep Learning

SBIG

- Delivered a centralized vendor timesheet and billing platform on strict timelines, streamlining external employee tracking and increasing attendance audit efficiency by 100%.
- Pioneered an AI-powered facial recognition microservice using FastAPI, FaceNet-512, and Cosine Similarity, achieving over 85% mean accuracy for biometric attendance.

VisionAid Exam System - React.js, Node.js, Raspberry Pi, MySQL

[GitHub]

- Engineered an accessible MCQ-based exam system for visually impaired students, integrating a custom 6-key hardware keyboard with Text-to-Speech APIs to reduce exam processing time by 40%.
- Awarded the prestigious "Best Software Project" among 400+ final-year students; presented the working prototype to distinguished leadership including Hon. Sharad Pawar, receiving formal appreciation.

EDUCATION

Sardar Patel Institute of Technology (SPIT)

June 2021 - March 2025

Bachelor of Technology in Computer Science (AI & ML)

CGPA: 8.21
